Four Secure Ways to Pay

With Snap* Hosted Payments in place, realizing secure payments is easier than ever – with four simple ways to implement, it's a Snap* to start accepting payments today.

MERCHANT'S ONLINE STORE	SNAP* SECURE HOSTING	EVO NETWORK

Online Shop · Checkout Page · Success

Hosted Pay Page

Europe · USA · EVO PAYMENTS INTERNATIONAL

① URL Redirect
(Most Popular)

When it's time to pay, users are directed from your online store to a secure payment page, hosted by EVO Snap*. You'll customize the page to look like your website, but we'll handle the sensitive data required to process a payment – dramatically reducing your PCI scope of responsibilities and risk. When payment is complete, we'll send users back to your site.

---

② Embedded Payment

Embed a secure payment form directly into your existing website to collect online donations or payments.

③ Social Payment Widget

Securely accept payments or sell items directly from online community and social sites.

④ Secure Payment Link

Create click-and-pay invoices by adding a secure, encrypted payment link to any email or payment invoice.

FREE WITH HOSTED PAYMENTS

Snap* Merchant Management Center

With real-time reporting and in-depth transaction management you can easily track sales, manage orders and subscriptions, process returns and voids, as well as activate risk/fraud filters to get the most from your Snap* Hosted Payments account.
